

## DL011

### WebAlert™ Remote Datalogging & Monitoring System

- Datalogging with Web based Monitoring
- 6 Channel 4-20mA Recorder
- 6 Digital Channels
- 1 Dry Contact for remote alarm
- Access Data Manually, PC, or Internet
- Communication by Local RS232 or Ethernet
- Multi-user Access
- Communication via Text Message, E-mail, or Computer

WebAlert™ allows online monitoring, datalogging, auto-reporting and auto-alarms. With the ability to monitor up to six (6) 4-20mA signals and six (6) discrete digital inputs. It upgrades control systems with remote communications and data acquisition technology.

WebAlert™ is a stand-alone remote recording and monitoring device that will seamlessly web-enable your installed equipment without having to replace or upgrade it. Your key system parameters can now be monitored from any computer - anywhere in the world - with a password protected standard web browser.

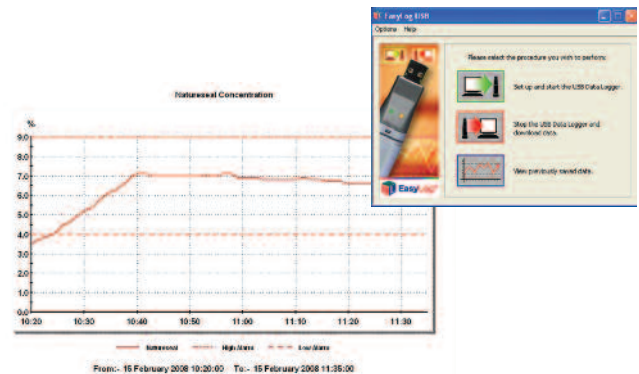

## DL-USB-4
